Washington, DC 20554

Dear The Federal Communications Commission,

The flat-fee Universal Service Fund proposal is unfair. I urge you to oppose this plan. With wages not being adjusted for inflation (increased demands for funds by government, increases in those costs that are not accounted for in the cost indexes and GDP, for example fuel for vehicles, fuel for home heating, electrical and water utilities, and food) each expense for survival expenditures reduces all discretionary expenditures. Less contribution to the overall consumables markets that drive 2/3's of the national and local economies.

I support the Keep USF Fair Coalition. Stopping the flat fee tax is important to my family.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make several or lengthy calls. I have no desire to subsidize other people in the usage of their discretionary income. Pay-as-you-go means just that. As a prepaid telephone customer. I am already paying-as-I-go for the resources and/or services that I use. I urge you to reject this flat-fee proposal.

Thank you.

cc: FCC Chair Kevin Martin, Congress

Sincerely,

Eric Dew
